**T**HE DV 20 is a slightly smaller version of our flagship DV 22 model while still offering all of the same features and options. At 300 Max HP, you have best-in-class top-end speed and performance guaranteeing a smooth dry ride even in rough water conditions. Like the DV 22 you can expect industry-leading innovations such as 8 available cockpit configurations and removable pods.

**OVERSIZED** compartments to store rods and cockpit tackle stations provide easy access to all your gear for a relaxing or competitive day on the water.

**CAYMAS** has made its mark as the fastest growing boat manufacture in the US with high-quality boats built with more customization options than any of our competitors. The manufacturing team averages over 30+ years of boat building experience, so every boat is designed with the sportsman in mind. Caymas stands apart from other brands because of performance-focused engineering and built-to-last materials.
